UNIVERSIDAD RICARDO PALMA / 8-9

ARCHIVO DE HISTOLOGIA ANIMAL COMPARADA

Bibliografía completa de cultivo de tejidos animales.

Parte I: 1927 - setiembre 1966.

Vera Alleman

Introducción: El estudio experimental del tejido, definido como un conjunto de células que presentan la misma función y la misma morfología, se concreta en la tecnología del cultivo de tejidos.

Es especial interés del Laboratorio de Histología Animal de la Universidad Ricardo Palma de constituir su centro de documentación al respecto.
