ACM **DL** DIGITAL
LIBRARY

- La [ACM Digital Library](#) es una plataforma especializada en informática y tecnologías de la información. Contiene el **texto completo** de todas las publicaciones de la [ACM](#) (Association for Computing Machinery) y además permite el acceso a las publicaciones de otras organizaciones miembros de la ACM.
- Está integrada con la **ACM Guide to Computing Literature**, base de datos bibliográfica que recoge **referencias y resúmenes** de trabajos especializados en informática publicados por más de 5.000 editores.

Navegar por tipos de publicaciones y colecciones

Desde la página de inicio podemos acceder a los diferentes tipos de **publicaciones** y secciones de la **ACM**:

- **Journals:** más de 50 revistas académicas revisadas por pares
- **Magazines:** 7 revistas con artículos, noticias, opiniones, etc.
- **Proceedings:** actas de más de 170 congresos, simposios, convenciones, etc.
- **ACM Books:** monografías especializadas y textos de nivel universitario. Se incluyen búsquedas específicas de autores, afiliaciones y ganadores de premios
- **SIGs (Special Interest Groups):** acceso a la información y documentación generada por los 37 grupos que impulsan la investigación en las principales áreas de la informática
- **Conferences:** información sobre todos los congresos de la ACM (actas, fechas, lugares)
- **People:** perfiles de los autores que publican en la ACM

- **Información del registro**
- A través del título del artículo accedemos a la página de información completa del registro y a las funcionalidades que se ofrecen al usuario:
- **Compartir** el artículo por correo o a través de las redes sociales
- Crear una **alerta** para las citas recibidas por el artículo (es necesario tener una cuenta personal)
- **Guardar** el registro en una carpeta (también es necesaria tener una cuenta)
- **Exportar** la referencia bibliográfica en los formatos BibTeX, EndNote o ACM Ref. Si el gestor de referencias bibliográficas utilizado es [Zotero](#), simplemente hay que seleccionar el icono correspondiente de la barra de navegación para que se realice la exportación de la referencia de manera **directa** (bien de un conjunto de registros desde la página de resultados o bien de un registro concreto desde la página de información del mismo)
- La **barra de herramientas** de la derecha facilita el acceso directo a toda la información disponible del artículo y a su consulta.
- Al final del registro se incluye la **clasificación temática** del artículo en forma de gráfica que permite seleccionar los términos asignados y acceder a los documentos clasificados en esa área.

Access to ACM DL during COVID-19

Recognizing that many computing researchers, practitioners, and academics are now working remotely, ACM is committed to supporting research, discovery and learning during this time of crisis. For the next three months, through June 30, 2020, we are making all work published by ACM in our Digital Library freely accessible. [Learn more](#)

ABSTRACT

Nowadays people use mobile devices in different ways to make a profit. In this paper we present a literature review to know the use of the mobile devices as a learning tool, the factors that influence their use, and the advantages and disadvantages of the use of mobile applications that strengthen learning. Researchers seek to dispel doubts about the possibility of choosing mobile devices as tools for learning. As a result of this study it was found that the factors that influence the adoption of these tools are relevant, the advantages are really beneficial, and that students' academic performance can increase relatively.

assimilate these tools: be motivated to register for an e-course; participate and complete course; transfer and initiate change; sustain change, where the experience is generally positive for the students [6].

Activities that are considered motivating should include three elements: competence, autonomy and context [7]. Furthermore, a number of students may understand better through games, in which factors that influence learning are design and applications that are easy to use [8].

In this way, mobile devices can be used to reinforce or introduce students to learning a language [9]. M-learning, which allows

ABSTRACT

Between 2011 and 2013, an updated set of national standards for secondary school computer science education was introduced in New Zealand. This change caused great difficulties for many existing “computing” teachers. After many years of teaching primarily word processing, they were suddenly tasked with teaching programming, even though they were themselves unable to program. In this paper we describe the structure and results of two in-service professional development workshops for these teachers. The workshop structure places emphasis not only on improving a teacher’s programming skill, but on exposing him or her to validated pedagogical techniques in programming education. Preliminary results are positive, with most teachers being able to transfer the training into their own classrooms. After the workshops, teachers continue to request support, especially additional classroom-ready materials. We maintain that effective in-service training must include this ongoing support.

Páginas de perfiles de autores e institucionales

Los perfiles de los autores e instituciones que han publicado trabajos en las publicaciones de la ACM se encuentran disponibles en el apartado People.

Los autores pueden buscarse por nombre concreto o a través de los filtros de materia, afiliación, ubicación geográfica, etc. y se puede acceder a la **página del perfil** o a una **vista rápida** con un resumen de los datos relativos a sus publicaciones.

The image displays the ACM People search interface. On the left, a sidebar titled "People" shows search filters for Applied Filters, Subjects, and ACM Affiliations. The main area shows a search for "Patricia Pons" with a search bar and a search button. Below the search bar, a list of search results is shown, including a profile for Patricia Pons. A red arrow points from the search results to the profile page.

The profile page for Patricia Pons is shown in the center. It includes a search bar for her work, a profile picture, and a list of affiliations: Universidad Politécnica de Valencia, C. T. Daires, and Universidad Politécnica de Valencia. The page also displays a list of subjects: Human-centered computing and Animal Computer Interaction. A table of statistics is shown below the affiliations, with columns for various metrics and values.

Metric	Value
4,734	48
11	2012 - 2018
9	103,331
1%	379
1,000	

On the right, a detailed view of the profile page is shown, including a bar chart of research interests, a network diagram, and a list of publications. The bar chart shows research interests in Human-centered computing and Animal Computer Interaction. The network diagram shows connections between authors. The list of publications includes titles, authors, and years.
